

Tasty Bites Restaurant Sales Analysis

Business Performance Dashboard and Strategic
Insights

📅 Reporting Period: July 2024 -February 2025

Power BI

MySQL

Analytics

Presented By: Sonia Nzau

Project Overview

Scope, data foundation, and analytical approach behind this report

OBJECTIVE

Analyze restaurant sales data to identify trends, customer behavior, and operational insights that support data-driven business decisions.

DATASET SUMMARY

- 250 complete daily sales records across an 8-month trading window
- Fields tracked: daily sales, customers served, feedback score, day of week, weather, promotions, and top-selling menu item
- March 2025 (7 days) excluded from some trend analysis — the month is still in progress and would distort monthly comparisons

METHODOLOGY

Sales transactions were consolidated in Excel, modeled and queried in MySQL, then visualized in Power BI to surface trend, correlation, and segment-level patterns used throughout this deck.

RECORDS ANALYZED

250

complete daily transactions

ANALYSIS PERIOD

8 Months

Jul 2024 – Feb 2025

TOOLS USED

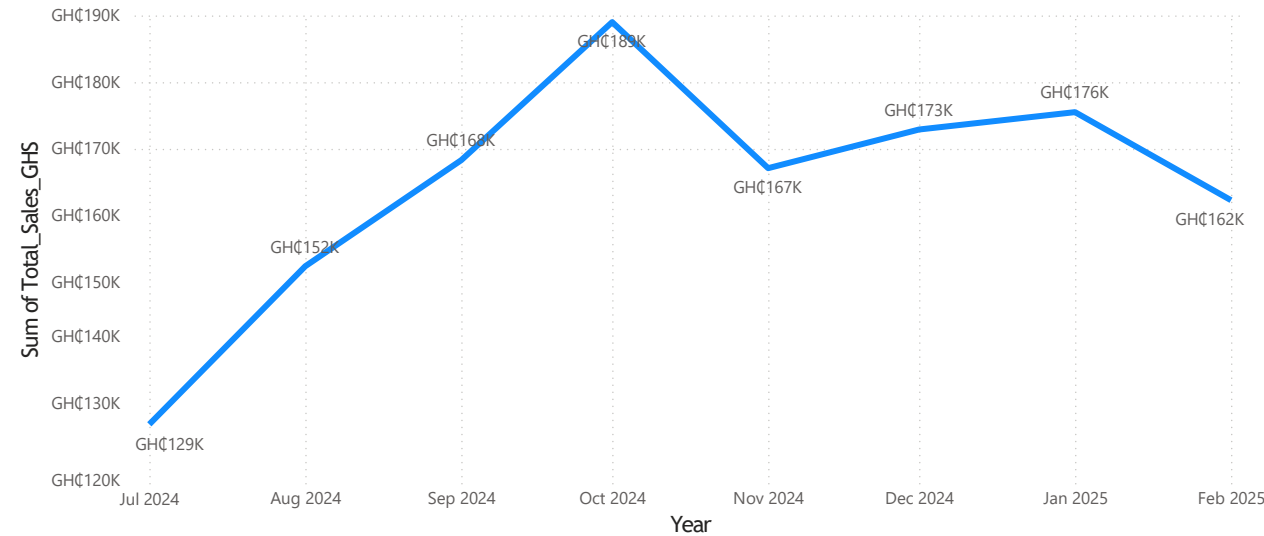

Excel · MySQL

Power BI

Sales & Customer Trends

Monthly Sales Performance, July 2024 – February 2025 (March excluded — incomplete)

Sum of Total_Sales_GHS by Year and Month

Key Insights

- Sales increased steadily from **GH¢129K** in July to **GH¢189K** in October.
- October recorded the highest monthly revenue.
- Sales declined after October but remained relatively stable through January.
- February closed at **GH¢162K**, indicating a slowdown that may require further investigation.

EXECUTIVE INSIGHTS

PEAK MONTH
October 2024

GHS 189,000 in sales

LOWEST MONTH
July 2024

GHS 128,700 in sales

OVERALL TREND
+31% growth

Jul → Oct 2024, then plateaus

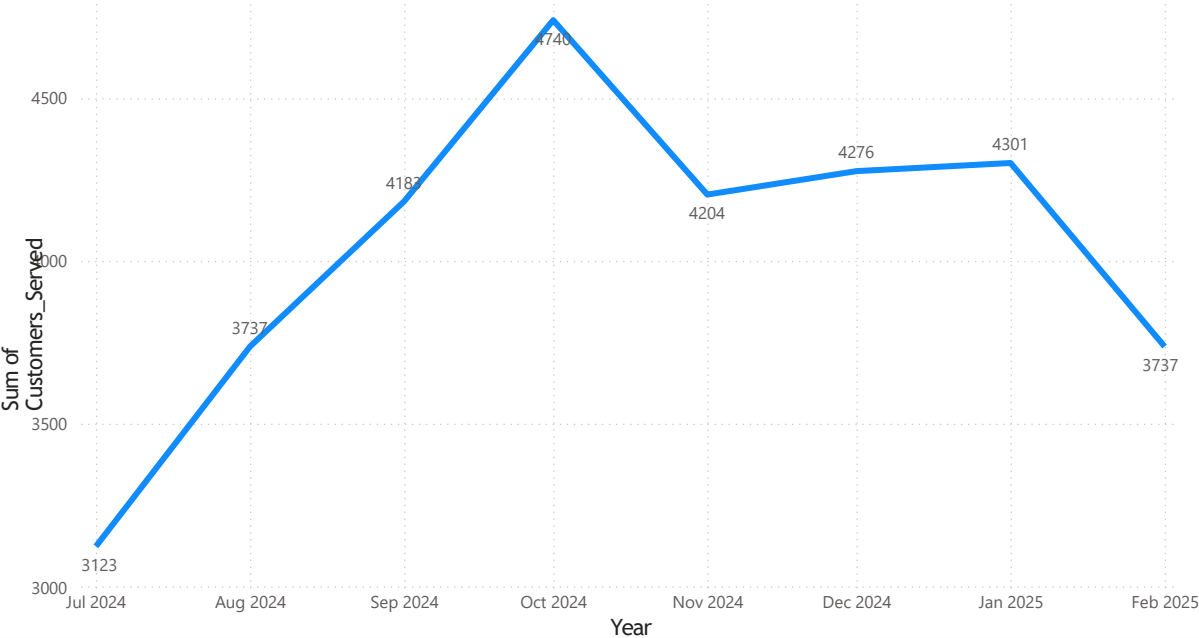

CUSTOMER PATTERN
Tracks sales closely

traffic is the primary sales lever

Sales & Customer Trends

Monthly Sales Performance, July 2024 – February 2025 (March excluded — incomplete)

Sum of Customers_Served by Year and Month

Key Insights

- Customer traffic increased steadily from **3,123 customers** in July to **4,740 customers** in October.
- October recorded the highest customer volume during the reporting period.
- Customer traffic declined after October but remained relatively stable through January.
- February closed with **3,737 customers**, reflecting a noticeable reduction in restaurant visits.
- The customer trend closely mirrors the monthly sales trend, indicating that customer traffic is a major driver of revenue.

EXECUTIVE INSIGHTS

PEAK MONTH
October 2024

GHS 189,000 in sales

LOWEST MONTH
July 2024

GHS 128,700 in sales

OVERALL TREND
+31% growth

Jul → Oct 2024, then plateaus

CUSTOMER PATTERN

traffic is the primary sales lever

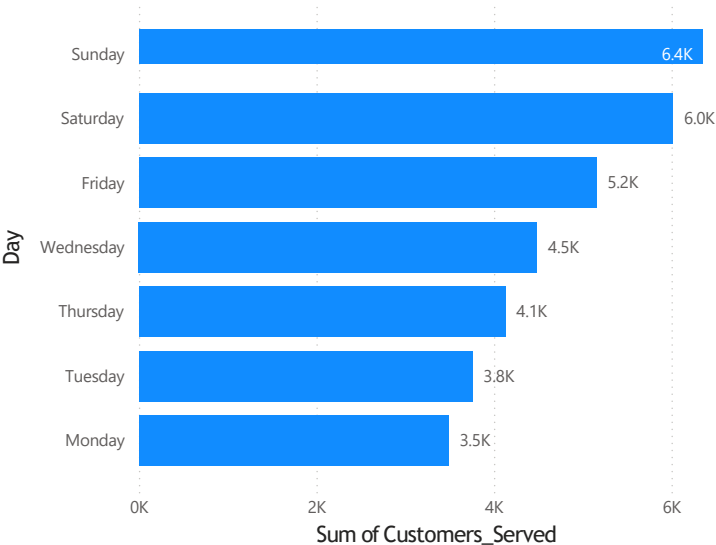

Operational Performance Drivers

Three external and operational factors that shift daily performance

Busiest Days

Customers Served by Day

Promotion Impact

Average Sales: Promotion vs No Promotion

Peak Traffic

Sunday recorded the highest customer traffic (**6.4K customers**), making weekends the busiest trading period.

Promotion Impact

Promotional campaigns increased average daily sales from **GH¢5.2K** to **GH¢5.7K**, showing a positive impact on revenue.

Business Insight

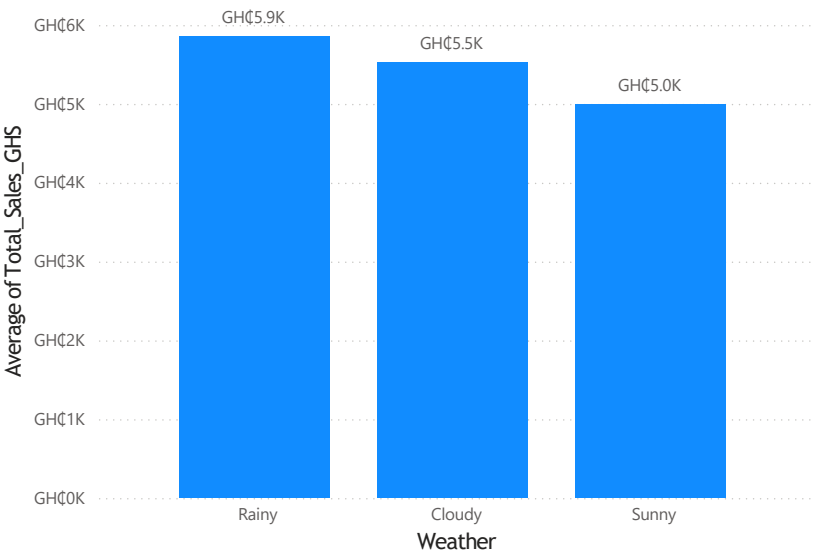

Customer traffic and promotions are key drivers of restaurant performance and should be prioritized in operational planning.

Operational Performance Drivers

Three external and operational factors that shift daily performance

Weather Impact

Average of Total_Sales_GHS by Weather

Executive Insights

 **Highest Sales**
Rainy Weather
GH¢5.9K average daily sales

 **Sales Difference**
+18% Higher
Rainy days generated approximately **18% more sales** than sunny days.

 **Business Insight**
Weather Influences Demand
Customer purchasing patterns vary across weather conditions.

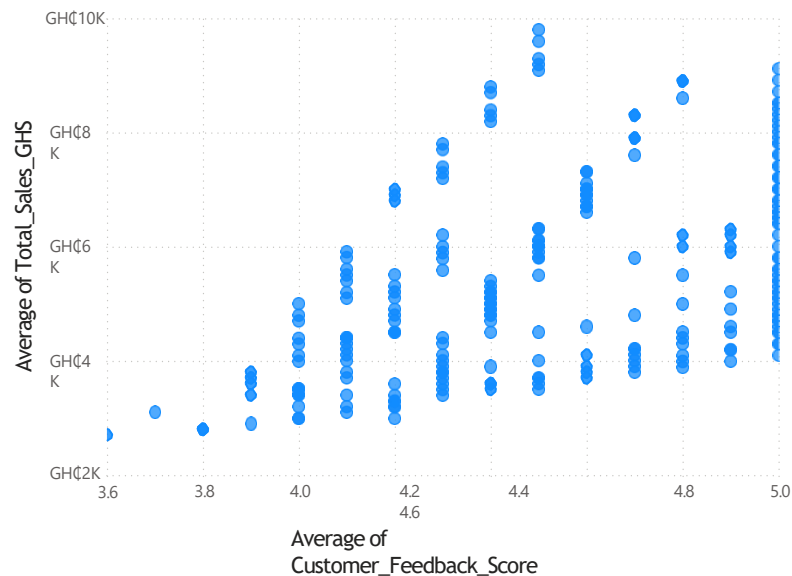

Customer Behaviour and Sales Relationships

Understanding the key factors influencing restaurant revenue

Relationship Between Customers Served and Total Sales

Average of Customer_Feedback_Score and Average of Total_Sales_GHS by Record_ID

Customer Volume

Strong Positive Relationship Higher customer traffic consistently resulted in higher sales revenue.

Customer Satisfaction

Positive Association Higher customer feedback scores were generally associated with increased sales.

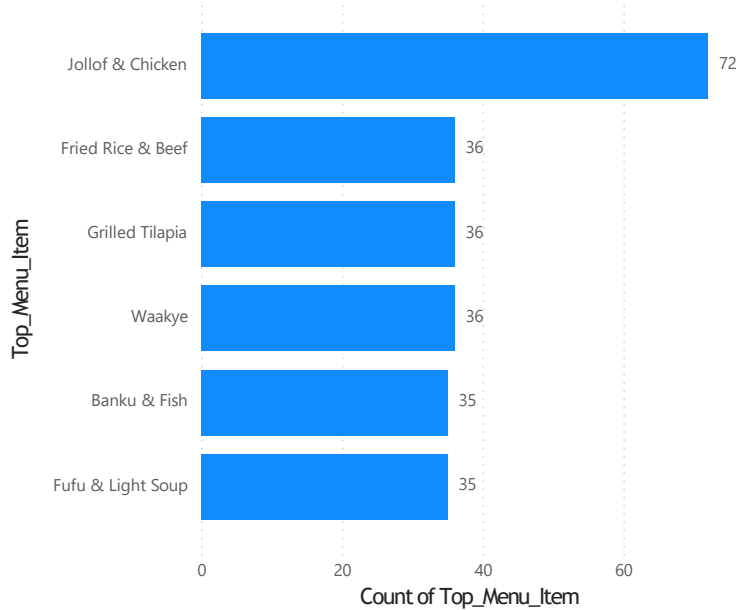

Business Insight

Revenue Growth Driver Growing customer traffic while maintaining excellent service quality supports sustainable revenue growth.

Menu Performance

Which dishes are earning their place on the menu

Most Popular Menu Items

TOP SELLING MENU ITEM

Jollof & Chicken

72 orders

28.8% Menu share

WHY THIS MATTERS

Jollof & Chicken is the restaurant's highest-demand menu item, making it a key driver of sales. Its consistent popularity supports demand forecasting, inventory planning, and purchasing decisions while creating opportunities for targeted promotions.

RECOMMENDED ACTION

Leverage Jollof & Chicken in combo meals and promotional bundles to increase average order value while encouraging sales of lower-performing menu items.

Business Recommendations

Three priority actions to convert insight into revenue

1

Increase Promotions During Low Seasons

Increase promotions during January and February to stimulate customer demand during slower trading periods.

EXPECTED IMPACT

Expanding promotions during slower periods can increase customer traffic and support more consistent monthly revenue.

2

Optimize Weekend Operations

Align staffing schedules and inventory planning with higher weekend customer demand to ensure efficient service during peak trading periods.

EXPECTED IMPACT

Optimizes staffing and inventory planning during peak demand periods, helping maintain service quality and maximize revenue opportunities.

3

Bundle the Menu Around Jollof and Chicken

Leverage the popularity of **Jollof & Chicken (28.8% menu share)** by offering combo meals and promotional bundles with complementary menu items.

EXPECTED IMPACT

Encourages cross-selling opportunities, increases average order value, and improves the visibility of lower-performing menu items.

Key Takeaway: Customer traffic, promotions, operational planning, and menu optimization are the primary drivers of sales performance at Tasty Bites Restaurant.

Executive Summary

Four Critical Insights from the Tasty Bites Sales Analysis

Sales Trend

Sales increased steadily to a peak in October 2024 before moderating in the following months, highlighting opportunities for targeted seasonal promotions..

Customers

Customer traffic showed a strong positive relationship with revenue, making customer acquisition and retention key business priorities.

Promotions

Promotional campaigns were associated with higher average daily sales, demonstrating their value as a revenue growth strategy.

Customer Satisfaction

Higher customer satisfaction scores were associated with stronger sales performance, reinforcing the importance of delivering a positive customer experience.

Executive Conclusion

The analysis demonstrates that customer traffic, promotional strategies, operational planning, and menu optimization are the primary drivers of sales performance at Tasty Bites Restaurant. Implementing these recommendations can support sustainable business growth and improved operational efficiency.
